

ANGLED THERMOCOUPLE

DESCRIPTION:

The angled thermocouple is a special assembly for crucibles and open industrial processes where the element cannot be placed on the roof or dome.

SENSOR FEATURES:

Type	Single / Double
Sensor	T, J, E, K, N, S según IEC 60584-1
Tolerance	Class 1
Number of Threads	2 / 2x2
Temperature range	From 0°C to +1500°C

PROTECTIVE SHEATH:

Type	Simple
Material	Stainless Steel, Refractory Steel
Diameters	10, 15, 17.2, 20, 21.3mm
Length	from 200mm to 1500mm

EXTENSION:

Material	Stainless steel, refractory steel, ceramics
Diameter	13.5, 15, 17.2, 20, 21.3mm
Length	from 100mm to 500mm

ELECTRICAL CONNECTION:

Head	DIN A, DIN B, KN, ATEX
Cable gland outlet	RM20x1.5, RM16x1.5, PG16

** Other constructions on request.*

ACCESSORIES:

Converter in head	4-20mA, 0-10V
